Low-Level Design Created Jun 23, 2025 (07:58) by PAWLACZYK-ext, Kacper , last modified Jun 23, 2025 (07:58) by PAWLACZYK-ext, Kacper

Definition

[Link](#) [Link](#)

A Low-Level Design architecture provides detailed documentation of an application's components and workflows, enabling support teams (application owner, infra, network and security) to efficiently troubleshoot, maintain, and update the system. This clarity reduces downtime, improves incident management, and ensures smooth knowledge transfer and compliance throughout the application's lifecycle.
