BFC Perimeter

Definition of the BFC Perimeter

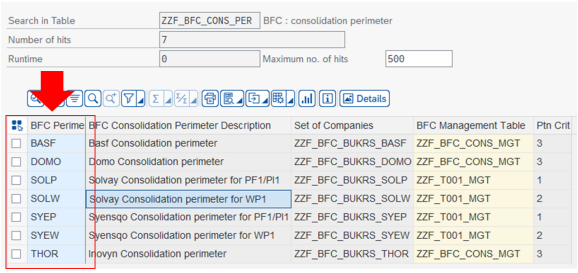
A BFC perimeter is a group of companies managed in PF2, PI2 or WP2.

Some companies belong to Solvay, to Syensqo or may have been sold to another group.

The main BFC perimeters are:

- Perimeter **SOLVAY**:
  - SOL**P**: Perimeter maintained in PF2/PI2
  - SOL**W**: Perimeter maintained in WP2
- Perimeter **SYENSQO**:
  - SYE**P**: Perimeter maintained in PF2/PI2
  - SYE**W**: Perimeter maintained in WP2

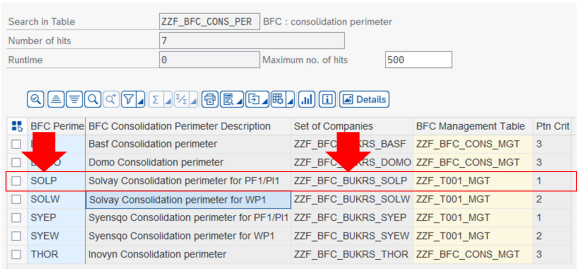
You can display all existing BFC perimeters using the table ***ZZF_BFC_CONS_PER - BFC : consolidation perimeter***



Display companies included in each BFC perimeter

Each BFC perimeter is a set of companies that can be displayed with GS 03 - Display Set

- The set of companies ZZF_BFC_BUKRS_SOL**P** & ZZF_BFC_BUKRS_SYE**P** are maintained in PF2 but can include companies managed in WP2
- The set of companies ZZF_BFC_BUKRS_SOL**W** & ZZF_BFC_BUKRS_SYE**W** are maintained in WP2 but can include companies managed in PF2



Ex: the BFC Perimeter SYEP = Set of companies ZZF_BFC_BUKRS_SYEP can be displayed in PF2 with GS03 - Display Set

Companies 0003, 2002, 2232, etc belong to the BFC Perimeter SYEP = **SYENSQO**

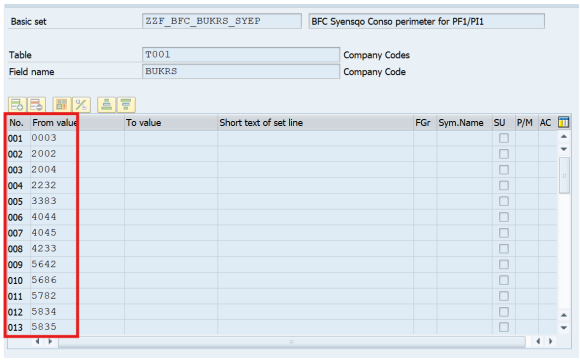


Table ZZF_BFC_CONS_MGT

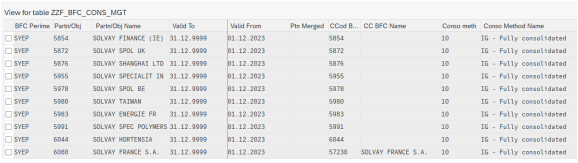
All companies not included in the BFC Perimeter SYENSQO (SYEP & SYEW) are included in the table ZZF_BFC_CONS_MGT with their conso method.


The table ZZF_BFC_CONS_MGT is used to determine the conso method of a company code in some programs instead of the Table ZZF_T001_MGT_V - Company codes (for instance for the scope Syensqo, the determination of the COPA movement type in WP2 is done using the table ZZF_BFC_CONS_MGT)
