

ADL Coating Alpharetta

ACTIVITIES

- Research, Development, and Technology (RD&T) facility dedicated to technical support for Solvay Specialty Polymers aromatics
- Small scale equipment to simulate customer processes, test properties of polymers, and formulate solutions
- Project support includes customer technical requests and assistance as well as application development. This includes product selection, new products, processing, claims investigation, and sampling.
- Collaboration with Technical Development, Sales Development, Regional Sales, Customer Care, Operations

CAPABILITIES

LIQUID COATING	Paint formulation and testing for solvent and water-based systems
Powder COATING	Coating application and testing for powder systems
COATING TESTING	Instruments for coating evaluation
Capability slides	Lab introduction

PRODUCT PORTFOLIO EXPERTISE

Ketaspire PEEK

Torlon PAI

Ryton PPS

Veradel PESU

Radel PPSU

Udel PSU

Diofan PVDC

Halar ECTFE
