

Space Permission Scheme

Syensqo Permission Scheme

Project permissions define who can access a project and what they can do (create and comment on issues, for example). Access to individual issues is defined in [issue security](#).

Note: Permission schemes may be used by multiple projects. Modifying a scheme will affect any project it's associated with.

We have created five roles:

1. **Administrator** – Can add or remove users, Space configuration + All below roles permission
2. **Space Viewer** – Can only view data, add comments
3. **Space Team Member** – Can create, view, edit, delete, link and (Add, Edit ,Delete all) Comments.
4. **Space Report** – Can create, view, edit, link, Add Comments, Delete Own Comments and Edit Own Comments
5. **Space Coordinator** – Intended for Scrum Masters to manage sprints. + (Space team member role permissions)
