SIP Office: Security, Integrity, and Protection

Who We Are

The SIP (Security, Integrity, and Protection) Office is Syensqo's dedicated team for IT risk management and cybersecurity. Our mission is to identify, prioritize, and manage risks related to IT solutions and third-party collaborations—ensuring Syensqo's digital assets and operations remain secure, compliant, and resilient.

What We Do

- **Solutions Risk Analysis:** Assess and control risks associated with IT solutions.
- **Third Party Risk Management:** Evaluate and manage risks from IT vendors and partners.
- **Technical Audits:** Conduct penetration tests and configuration audits to detect and remediate vulnerabilities.
- **Governance and Policy Contribution:** Participate in key committees and help shape Syensqo's security policies.
- **Integration with Business Processes:** Embed risk management and security assessments into Syensqo's project portfolio process.

How We Work

1. **Contact:** Reach out to the SIP Office to start your assessment.
2. **Information Collection:** Submit required documents (e.g., risk questionnaires).
3. **Analysis:** The SIP analyst reviews your input and conducts a security analysis.
4. **Reporting:** Receive a summary report and recommendations to support secure decision-making.
