

LM01_KDD019 - SharePoint Default Site

Status	DECIDED
Owner	Eric TRIFFAUX
Stakeholders	Avanade, TDA, TRIFFAUX, Eric , Valentine RUBY

Decision: Option 2: redirect users to the current intranet "THEHUB"

Decision made by: INFRA TDA

Date: 02 Apr 2026

Online Meeting: TDA

Issue

As part of adopting SharePoint Online, a **default root site** already exists in the tenant. Because it is not yet used and to avoid uncontrolled access, permissions have been temporarily removed.

While preparing the official SharePoint adoption, we need to determine if we continue with this or redirect to the intranet TheHub.

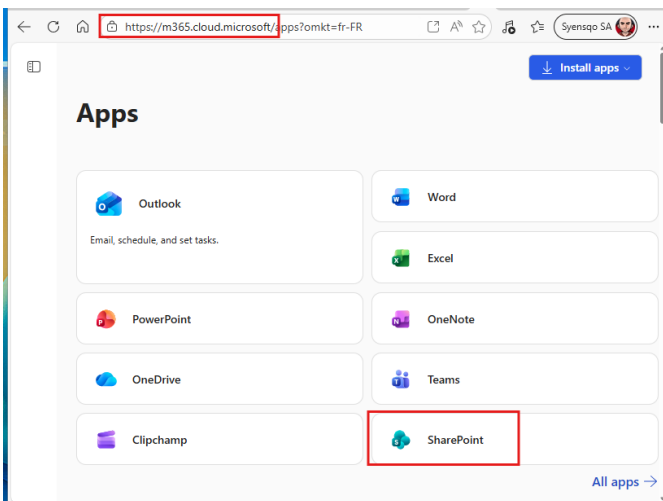

Recommended Decision

Option 2 : Redirect to the Intranet

Options considered

option 1 : Interim solution in place today **block permission** to avoid users to access the default sharepoint.

Pros : the users can access sharepoint via the sharepoint app

Cons : accessing this URL : <https://syensqosa.sharepoint.com/> is giving an error, while the default page is blocked

Sorry, you don't have access.

I'd like access, please.

Request Access

Option 2 : Redirect users to the current intranet "THEHUB"

- While there is not yet any ambition to adopt SharePoint as Intranet, or central hub, put in place a redirection to <https://thehub.syensqo.com/en>
- Use Site redirects to perform this from the default SharePoint site to "thehub".
- If a user tries to access the default page the <https://syensqosa.sharepoint.com/> this will automatically redirect him to the Intranet : <https://thehub.syensqo.com/en>
